OBJECTIVE

With over 12 years in software engineering, I've had the opportunity to work across technical and business roles — from co-founding a startup to spearheading digital transformation, owning products, and architecting scalable solutions. I'm passionate about building impactful, forward-thinking technology while maintaining a strong focus on quality, standards, and long-term value. I'm now looking to take on a leadership role where I can bring together innovation, execution, and strategy to drive meaningful results and help teams do their best work.

ACCOMPLISHMENTS

- **Raised over \$200K USD** for a tech startup, successfully leading fundraising strategy, investor communications, and product delivery.
- **Awarded the Rotaract International Annual Award for Innovation (Asia)** recognition of technology-driven social impact and creative problem-solving.
- Led multiple strategic initiatives that contributed to cost savings of up to **\$300 million USD** for global organizations.

Experience

ExxonMobil (Formerly Pioneer natural resources)

Jul 2018 -Till Date

Project Sirius (Exxonmobil - Pioneer Integration)

Platform Owner

- **Owned a core application platform**, leading migration, re-implementation, and retirement of all solutions within the platform as part of the broader Exxon/Pioneer technology integration.
- **Contributed to a \$600M enterprise-wide integration initiative**, focused on unifying systems, tools, and processes between ExxonMobil and Pioneer.
- **Led system and process evaluation efforts to define and deliver key platform deliverables**, including architectural decisions, migration plans, implementation roadmaps, and retirement strategies.
- **Collaborated with cross-functional stakeholders**, including engineering, cybersecurity, infrastructure, and compliance teams, to ensure alignment and execution to **support change management and risk mitigation activities**.
- Oversaw delivery efforts for the ExxonMobil side, ensuring on-time implementation of applications while coordinating across **workstreams** and **integration partners**.
- Played a key role in **rationalizing and modernizing legacy systems**, helping to reduce technical debt and accelerate **digital enablement** across business units.

EDUCATION

MASTER OF BUSINESS ADMINISTRATION

NWMSU, International Management

MASTER OF SCIENCES

NWMSU, Applied Computer Science

BACHELOR OF TECHNOLOGY

JNTU, Chemical Engineering

SKILLS

Core Competencies

- Digital Transformation Strategy
- Enterprise Solution Architecture
- Cross-functional Leadership
- Emerging Tech & Innovation Advisory
- Program & Portfolio Management
- Change Management & Governance
- Strategic Roadmapping & Execution

Technical Skills

- Microsoft Power Platform & Dynamics 365
- Azure (AI, IoT, Computer Vision, Logic Apps)
- Robotic Process Automation (Power Automate, UiPath)
- ERP & System Integration (SAP, Oracle, Custom APIs)
- Data & Analytics (Power BI, Azure Synapse)

Water Management Platform

Solution Architect

- Led the design and delivery of scalable applications supporting the **Purchase-to-Pay process**, helping manage over **\$300M** in annual spend.
- Helped improve **operational efficiency by 40%** by simplifying workflows and reducing manual data entry through smarter system integration.
- Worked closely with teams to define the product roadmap and integrate the platform with key systems like **ERP, invoicing, and asset management tools**.
- Played a hands-on role in Agile delivery, guiding the team from early **PoCs to full-scale rollout** — including features like vendor support via **Copilot**.

Emerging Tech & Automation

Solution Architect

Microsoft Power Platform Projects

- Helped establish a Community of Excellence to guide how the organization used Power Platform, focusing on governance, adoption, and reducing manual processes.
- Oversaw a portfolio of 30+ custom apps built on Power Platform and Dynamics 365, improving day-to-day operations and business efficiency.
- Shaped the platform's direction by defining roadmaps, supporting teams from idea through launch, and leading change management efforts to drive adoption.

Blockchain Consortium Initiative

- Partnered with a cross-industry blockchain consortium to explore decentralized solutions for supply chain transparency and smart contract workflows.
- Led architecture evaluations for enterprise-grade platforms (Hyperledger Fabric, Ethereum) to enable secure and auditable transactions.
- Developed smart contract prototypes that streamlined invoice approvals and vendor reconciliation.
- Successfully reduced **vendor payment cycle from 40 days to just 2 days**, significantly improving the invoice-to-pay process and vendor satisfaction.

Emission detection system initiative

- Architected an **AI + IoT solution** for real-time methane and carbon detection, targeting **\$2M+ in ESG compliance and environmental risk mitigation**.
- Integrated **Azure IoT and AI Vision** with sensor data to automate visual and chemical emissions monitoring.
- Enabled **predictive alerting and reduced manual inspection hours by 60% in field deployments**.
- Supported **ESG reporting automation** and improved environmental transparency across operations.

Software decision matrix initiative

- Designed a decision framework to streamline the **demand intake process** and guide teams in selecting the most suitable software for their project needs.
- Enabled faster, more informed decisions by evaluating tools based on **functionality, cost, scalability, and security fit**.
- Helped reduce software evaluation time by **30% and improved project alignment** with enterprise architecture standards.
- Supported over **12+ project teams in choosing fit-for-purpose tools**, reducing redundant software adoption and improving delivery efficiency.

Robotic Process Automation (RPA) Initiative

- Took the lead in evaluating and selecting the right RPA tools for the business, making sure they fit both technical and operational needs.
- Managed the rollout of automation solutions that delivered over \$1.7M in annual savings by cutting down repetitive, manual tasks.
- Drove user engagement and adoption by building internal awareness and providing support across teams to get the most out of the platform.
- **ons and enterprise workshops** to align stakeholders, define transformation KPIs, and embed digital into core business models.
- Built governance, delivery, and change frameworks to move organizations from strategy to sustained execution.
- Influenced major architecture and platform decisions, ensuring all technology choices supported long-term **business value and scalability**.
- Consistently positioned as the bridge between business and IT, trusted to turn complex challenges into clear, actionable strategies with measurable outcomes.

BCGPlatinion(Boston Consulting group)

Feb 2018 -Jul 2018

Expert Advisor (Digital transformation)

- Acted as a trusted advisor to senior leadership teams at **Fortune 500 clients** across telecom, beverage, and entertainment industries.
- Led **cross-functional digital transformation** strategies that delivered **25–40% operational efficiency gains** and accelerated innovation at scale.
- Identified **40+ enterprise-wide technology and process gaps**, translating them into strategic opportunities for cost savings, growth, and agility.
- Shaped and prioritized **\$20M+ in digital investments**, including automation, cloud modernization, and advanced analytics solutions.
- Facilitated **C-level strategy sessions and enterprise workshops** to align stakeholders, define transformation KPIs, and embed digital into core business models.
- Built governance, delivery, and change frameworks to move organizations from strategy to sustained execution.
- Influenced major architecture and platform decisions, ensuring all technology choices supported long-term **business value and scalability**.
- Consistently positioned as the bridge between business and IT, trusted to turn complex challenges into clear, actionable strategies with measurable outcomes.

Northhill Technologies Pvt Ltd

Oct 2011 -Mar 2016

Co-Founder/Program Manager

- Spearheaded **fundraising and investor relations**, securing critical early-stage capital and forging strategic partnerships to fuel company expansion.
- Championed **Process automation in finance**, slashing manual processing time by **60%** and accelerating claim throughput, boosting operational agility for an corporate insurance organization.
- Orchestrated the full lifecycle delivery of a **healthcare order management system**, improving efficiency by 40% and securing role-based access for **100+ users**.
- Delivered a scalable **training & placement platform** that increased NGO user engagement to, empower underserved communities.
- Directed development and launch of a **smart city food platform** engaging **350+ restaurant partners** and **2,000+ daily users**, elevating local business growth.
- Designed and implemented an **emergency blood donor alert system**, improving donor response times by 35%, directly impacting **life-saving efforts**.
